

ElementFree45

**Complete Home
Water Purification System
Eco-friendly**

**Energize Your Body with
Clean, Pure, pH Neutral Balanced Water**

The ElementFree45 Water Purification System manufactured and assembled in the US, is a “Point of Entry” system that purifies the water coming into your home or business. It takes out the toxins, but leaves the beneficial trace minerals. It provides clean, pure, pH neutral water for the whole family from every faucet in your home.

Benefits Include:

- *Eco-Friendly
- *Less soap used
- *Better Taste
- *Plumbing lasts longer
- *No water waste like Reverse Osmosis systems
- *Removes existing scaling
- *Skin and hair look younger
- *Improved Health
- *Plants and pets thrive on chemical free water

Removes or Reduces:

- *Nitrates & Nitrites
- *Metals (lead, mercury, etc.)
- *Pesticides
- *Fluoride & Chlorine
- *Sediment & Turbidity
- *Trihalomethanes (bromoform, chloroform, etc.)
- *Microbiological Organisms (cryptosporidium, etc.)
- *Bad taste and odors
- *Inorganic Chemicals
- *Plus many more contaminants

The Importance of Purified Water

Water is the most important element in the human body for restoring and maintaining a healthy life. The human body is 70% water. Pure water is essential to detoxifying the body and delivering nutrients. Water containing chlorine and other dangerous chemicals contribute to premature aging and disease. Pure water is the starting point to regaining your internal health. Drinking pure water isn't enough. It is equally important to cook with it and bathe or shower with it. Chemicals in tap water can also be inhaled as gasses in a hot shower. An article in the New Scientist Magazine reports "Showers lead to greater exposure to toxic chemicals contained in water supplies than does drinking the water. One can receive 6 to 100 times more of the chemical by breathing the air around showers and bath than by drinking the water".

Bottled Water

A \$29-billion industry is the fastest growing beverage industry in the world. Close to half of the U.S. population drinks bottled water on a regular basis, despite the fact it can be up to 1,000 times more expensive than the tap.

Natural Resources Defense Council (NRDC) conducted a study of 103 brands of bottled water (over 1,000 bottles were tested in all) and found that one-third contained synthetic organic chemicals and bacteria.

Bottled water on average costs \$1.50 per liter. Our water filtration products deliver pure water for just pennies a gallon. Imagine if you could afford to drink, cook, bathe, shower, and water your plants with purified water. It would cost you about \$290,250 to buy 45,000 gallons of bottled water. The ElementFree45 Water Purification System produces 45,000 gallons of pure, safe water at 2.5 cents a gallon for you to drink, bathe in, wash clothes with and water your plants and animals!

The Dangers of Contaminated Water

Chlorine:

- *hardens arteries
- *destroys proteins
- *irritates the skin and sinus conditions
- *aggravates asthma, allergies, and respiratory problems

“The cause of atherosclerosis and resulting heart attacks and strokes is none other than the ubiquitous chlorine in our drinking water”. Dr. JM Price

“The National Academy of Sciences estimates that 1,000 people die in the United States each year from cancers caused by ingesting the contaminants in water”. Janet Raloff- Sciences News, Volume 130

Look and Feel Younger!

The Complete Purification Solution - ELEMENTFREE45

- 3 stage Purification System
- 5 micron polypropylene pre-filter
- 5 micron KDF (creates an ionic molecular breakdown of contaminants)
- GAC (Granular Activated Carbon) Coconut Shell
- Comes with 1 year warranty
- Simple installation
- Minimal maintenance (replace filters every 9-12 mos.)
